Justin Upton

6'3 205 lbs.
B/T: R/R

Overview: Upton has been declining the last couple of seasons. In 2020 Upton showed he still has the ability to hit the ball hard however he needs to make more consistent quality contact. Offensively he struggled with breaking balls and should refine his approach by looking for fastballs he can do damage with to the pull side. Upton is also a declining defender who is not going to cover much range in the outfield.
